

MEGAPAWNSHOP

Company Presentation

## Megapawnshop LTD

Credit is an economic relationship between people that has been around for thousands of years already.

Passive income is the main goal of any investor, both a beginner and an experienced one. Searching for a new source of income, each investor will have to make a choice among countless options. Looking for the optimal way of income most people are guided by the basic parameters:

- minimum deposit amount;
- payback period of investments;
- minimum and maximum profit;
- available investment currencies;
- type of activity of the company;
- demand for the company's products or services.

The above list is not exhaustive since each investor can have additional parameters for himself. However, it should be remembered that it is precisely the type of activity that is one of the fundamental points, since it is this parameter that determines the prospects of the company.

The first successful investment inspires and encourages to take further steps. One victory inevitably entails a desire to re-invest and develop your own earning strategies. Every investor, of course, wants to keep his success as well as grow above himself and develop, not resting on his laurels.

But few people think about great risks that online investments involve. According to statistics, 9 out of 10 startups quickly burn down. Dynamic market and inflation are detrimental for young companies without well-considered development strategies that take into account all the risks. Such startups are often closed without returning their funds to investors.

## Your reliable partner

The Megapawnshop company offers you to become our partner in building a business in the segment of cryptocurrency online lending. The bet on this field of activity was made by us in the summer of 2018, at the peak of Bitcoin inflation. Holders of assets who purchased this currency at a cost above \$ 10,000 per unit suffered a complete financial collapse. Many were selling real estate, hoping to make money on the rapid growth rate. Crypto owners, who have lost their savings in this way, still don't want to spend capital until Bitcoin is high again.

**Megapawnshop helps customers use their own funds saving a promising currency. We issue loans secured by Bitcoin with the possibility of subsequent repurchase of cryptocurrency assets.**

## How to earn?

The company pays borrowers up to 70% of the current market value of Bitcoin. Each of our clients, in turn, can repurchase their assets at any time convenient for them.

If you have financial assets and want to make money, you can invest cryptocurrency in our platform to get high passive income. The size of payments on investment plans is **110% for 2 weeks** and **157% for 8 weeks**.

**Thanks to your capital investments we will provide credit services to an even greater number of borrowers, and you will receive dividends.**

# The main advantages
